

MODUL MANAGER

Create modern switches and sockets just the way you like them.

TEM

CONFIGURATOR OF SWITCHES AND SOCKETS

Choosing the right switches and sockets has never before been this fun, easy and comfortable. Now, you can use the MODUL MANAGER configurator from the comfort of your own home to design and put together modular Modul switches and sockets according to your personal tastes and wishes.

You can choose decorative frames from three design lines (Line, Soft, and PURE) and a wide selection of colours, patterns and shapes, meaning that you can easily create your switches and sockets to match your furniture, wall colours and space.

Combine elements and change the appearance

If you're not completely satisfied with the appearance of the elements, you can change them with a single click, replacing selected buttons, switches, sockets, frames and other functional elements with new ones

From completed sets to an offer in moments – make it fit your budget

The MODUL MANAGER includes product prices, which means you can see the price of your custom set or the entire project at every moment along the way. You can then easily make the offer fit your expected budget.

Always on hand – creativity at every corner

The MODUL MANAGER is always on hand, since it also works on smartphones and tablets. Play around with different colours and patterns and create modular switches and sockets according to your wishes.
